Highlight of Changes to the 2021-22 Producer Handbook

We are once again pleased to offer the 2021-22 Producer Handbook. The table below highlights the more significant changes to this year's edition. Minor additional changes have been made to provide clarity to topics but are not captured in this table due to the minute nature of the changes.

Topic	Page	Change
Credit-Sale Restriction	7	Includes information on the new CSR policy (effective August 1, 2021).
proAction	19	<ul style="list-style-type: none">- Includes more references to the Environmental module (effective September 1, 2021)- Added information referencing the Environment Questionnaire via the National Electronic Administrative System (NEAS) for activities required every two years.- Details regarding the Full Validation Compliance Policy and Self-Declaration Compliance Policy.
Milk Quality	26	<ul style="list-style-type: none">- Information added regarding milk temperature regarding automatic milking machines.- Additional clarification added regarding bulk milk grading: <i>A bulk milk grader shall not collect milk from a bulk milk tank if the milk in the bulk milk tank is not acceptable on the basis of its appearance, odour, temperature or other observable abnormalities.</i>- Updated costs for milk sample testing costs.- Updated address for the Central Milk Testing Lab (now located in the Alberta Milk building)
Contaminated milk	31	Added all new content about producer protocol if milk becomes contaminated.
Useful Phone Numbers and Websites	49	Contact information updated.
